Two story addition with kitchen and mudroom, bedroom & bath on 2nd floor

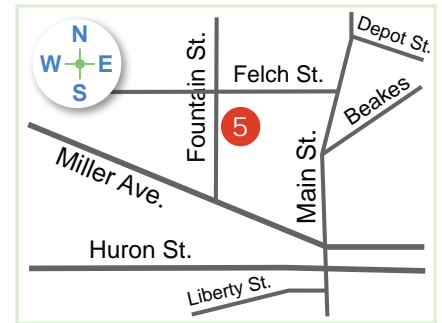

### About the Project

Phase 1 of a 2-phase project designed and built by Giraffe Design Build included a 2 story addition with expanded kitchen, powder room, pantry and custom shelving on the main floor. Complete window replacement as well as the shell for a future 2nd floor master bedroom and bath suite was accomplished.

Throughout the project, careful attention was placed on seamlessly replicating the existing style of this charming Old West Side house.

### About the Remodeler

For over 21 years the Giraffe Design Build team has been providing integrated services for homeowners. A Giraffe renovation is based on a careful study of the existing site, integration of new and complimentary design elements, and above all, a clear understanding of the homeowner's intentions – from design to completion.

From Main St., go west on Miller. Turn right on Fountain St., heading north. Arrive at 520 Fountain St.
