

DGW Construction

BASEMENT, MULTI-LEVEL IRREGULAR SHAPED DECK & PERGOLA, PAVER WALKS, & ROCK WALL PLANTERS

Photos by Liz Brauer

Address

3245 Textile Rd., Saline

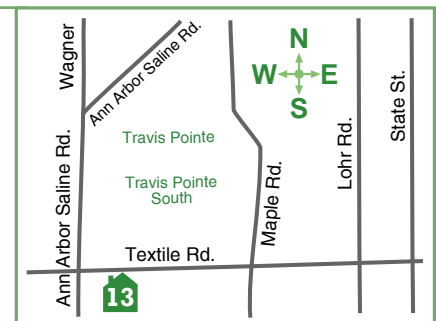

The Project

Dean Warner/DGW Construction, Inc. specializes in helping clients improve the function of their home. The walkout basement of this home was being underutilized so we helped the owners with a design that incorporated a living area, bedroom, new bath, a work/crafts room and ample storage as well. To enhance the use of their new walkout we expanded the living space outdoors. We built a new multi-level deck with a paver walkway and built-in rock wall planters. Many thanks to Chelsea Lumber and Fendt Building Supply. Come visit and see many of today's popular building products used in this remodel.

The Remodeler

Always Value - DGW Construction, Inc./Dean Warner starts the process with complimentary detailed design plans and specifications. We are a lean building company with low operational costs, which along with other efficiency measures, gives us the ability to provide competitive pricing. We share supplier discounts with our clients, offer reduced labor costs for non-peak months and offer homeowner participation options. Our fixed price contracts mean no surprises.

Always Quality - Dean is highly skilled at all trades and works hands-on each day. We encourage frequent client consultations and project reviews. Expert management and planning of all phases along with our long-term relationships with proven and reliable suppliers contribute to a successful project. Your satisfaction is guaranteed.

Our Project is located on Textile Rd. near Travis Pointe South. We are on the south side of Textile between Maple and Ann Arbor Saline Rd.
