

## KITCHEN REMODEL

BEFORE & AFTER

"After" Photo by Jeff Garland Photography

## 1081 Arlington, Ann Arbor

### THE PROJECT

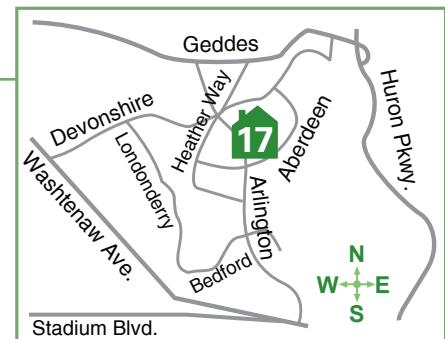

Come see this lovely kitchen transformation! It is amazing what increased light and a thoughtful floor plan can do!

Friends of the homeowners referred Acheson Builders to design and renovate the kitchen in this wonderful 1950's home. Jim Acheson's creative problem solving skills were required to overcome several difficult challenges during the design and construction process. Experience really helps when approaching challenges like this!

With an artful eye, Jim Acheson designed an open kitchen, with better traffic flow, a large kitchen island and lots of light coming through the new skylight, through dramatic new windows and reflecting off gleaming granite countertops.

### THE REMODELER

Acheson Builders is a full service design/build team - employing skilled professional craftsmen and designers. We strive to give each project our utmost attention - listening carefully to your wishes, integrating design artistry with budget constraints and sound construction technique, while using our best problem solving skills to overcome challenges along the way. We care deeply about making happy clients and we use up-to-date technologies for good communication and documentation, to help each project flow smoothly and efficiently.

House is on corner of Arlington and Aberdeen. Park along Aberdeen (a dirt road) and walk in via driveway on Aberdeen side. Enter through sliding doors off deck.
